

System Performance Glossary

Category	Target Filters/Panels	Term	Definition
Filters	All Panels	Universal Filters	Filters that affect all system performance charts. These filters are Household Type, Level of Detail, Project Type Group, and Race/Ethnicity Methodology Type.
Filters	All Panels	Demographic Filters	Filters that affect all system performance charts except demographics crosstab charts. These filters are Age, Veteran Status, and Race/Ethnicity.
Filters	Household Type	Household Type	A single-select universal filter that allows users to filter system performance data by three main household types: Adult Only, Adult Child, and Child Only. Household categorization is based on the age of household members on the first day of the report period (or at entry, if later). Eva also allows users to look at subcategories of household types for Youth and Young Adults. Households may be counted in more than one household type. For example, a 16-year-old parent with a 1-year-old child would fall into the Child Only and Youth and Young Adult household types. Eva system performance metrics and statuses reported by household type are calculated based on project enrollments associated with the respective household type.
Filters	Household Type	All Household Types	Households of all household types as well as households that are not categorized due to missing data.
Filters	Household Type	Youth and Young Adult	Households in which all members are under 25 years old. This category includes Child Only (CO) households, Adult Only (AO) 18-24 households, and Adult Child (AC) Parenting Young Adult households.
Filters	Household Type	Adult Only (AO)	Households in which all members are 18 years old or older.
Filters	Household Type	Adult Only (AO) 18-24	Adult Only households in which all household members are between 18 and 24.
Filters	Household Type	Adult Child (AC)	Households in which one or more members are 18 years old or older and one or more members are under 18 years old.
Filters	Household Type	Parenting Young Adult	Adult Child households in which all adults are between 18 and 24 and one or more of the adults is the parent of a child in the household.
Filters	Household Type	Child Only (CO)	Households in which all members are under 18 years old.
Filters	Level of Detail	Level of Detail	A single-select universal filter that allows users to filter system performance data by three levels of detail: All People, Heads of Household Only, and Heads of Household and Adults.
Filters	Level of Detail	All People	A Level of Detail selection that includes all clients in all households.
Filters	Level of Detail	Heads of Household and Adults	A Level of Detail selection that includes all heads of household regardless of age and people 18 years old or older in all households.
Filters	Level of Detail	Heads of Household Only	A Level of Detail selection that includes only the heads of households of all households regardless of age.

Category	Target Filters/Panels	Term	Definition
Filters	Project Type Group	Project Type Group	A single-select universal filter that allows users to filter system performance data by six project type groups: All Project Types, All Residential Projects, Residential: Homeless Projects, Residential: Permanent Housing Projects, All Non-Residential Projects, and Non-Residential: Street Outreach Projects. Eva system performance metrics and statuses reported by Project Type Group are calculated based on project enrollments associated with the respective project types within the selected Project Type Group. This means it is possible for different Project Type Group selections to show different System Performance results for the same client depending on the types of projects the client was enrolled in during the report period.
Filters	Project Type Group	All Project Types	A Project Type Group selection that includes all clients in all HUD-defined project types, with the exclusion of Homelessness Prevention projects. This is the default selection for the Project Type Group filter and provides the most complete picture of system engagement for households who were enrolled in both Residential and Non-Residential projects during the report period.
Filters	Project Type Group	All Residential Projects	A Project Type Group selection that only includes clients in projects that provide overnight accommodation. Project types that are considered as residential projects include: Emergency Shelter (ES) - Entry/Exit, ES -Night-by-Night, Safe Haven (SH), Transitional Housing (TH), Permanent Housing (PH) - Housing Only, PH - Housing with Services, PH - Permanent Supportive Housing, PH - Rapid Re-housing (RRH): Housing with or without services, and PH- Rapid Re-housing (RRH): Services Only. Clients enrolled in residential project types are considered to be experiencing homelessness as of the enrollment's Project Start Date. A client enrolled in a permanent housing project who has moved into housing (i.e., has a Move-In Date) would no longer be considered as experiencing homelessness. A Move-In Date that is after the Project Exit Date is considered a data quality issue, and that Move-In Date is ignored.
Filters	Project Type Group	Residential: Homeless Projects	A Project Type Group selection that only includes clients in a specific subset of residential projects: Emergency Shelter (ES) - Entry/Exit, ES - Night-by-Night, Safe Haven (SH), and Transitional Housing (TH). Clients enrolled in residential homeless project types are considered to be experiencing homelessness as of the enrollment's Project Start Date. For the purposes of System Performance, for ES - Night-by-Night enrollments without Exit Dates, Eva sets the Exit Date to be 15 days after the last recorded Bed Night or 15 days after the Entry Date, whichever is later.
Filters	Project Type Group	Residential: Permanent Housing Projects	A Project Type Group selection that only includes clients in a specific subset of residential projects: Permanent Housing (PH) - Housing Only, PH - Housing with Services, PH - Permanent Supportive Housing, PH - Rapid Re-housing (RRH): Housing with or without services, and PH - Rapid Re-housing (RRH): Services Only. Clients enrolled in residential project types are considered to be experiencing homelessness as of the enrollment's Project Start Date. A client enrolled in a permanent housing project who has moved into housing (i.e., has a move-in date) would no longer be considered as experiencing homelessness. A Move-In Date that is after the Project Exit Date is considered a data quality issue, and that Move-In Date is ignored.

Category	Target Filters/Panels	Term	Definition
Filters	Project Type Group	All Non-Residential Projects	A Project Type Group selection that only includes clients in projects that do not provide overnight accommodation. Project types that are considered as non-residential include: Street Outreach, Day Shelter, Supportive Services Only, Coordinated Entry, and Other. Since non-residential projects can serve both people who are experiencing homelessness and those who are housed, non-residential enrollments must have a documented homeless living situation in the Prior Living Situation (PLS) and/or a Current Living Situation (CLS) record to be included in Eva's system performance calculations. Clients enrolled in Street Outreach are assumed to be experiencing homelessness as of the enrollment's Project Start Date no matter the recorded PLS. For the purposes of System Performance, clients are considered active in long-term, non-residential project enrollments if there is a homeless living situation documented in a CLS record every 60 days. Coordinated Entry enrollments require a CLS record every 90 days to be considered active. Additionally, non-residential enrollments are considered active 15 days prior to the enrollment exit date if the exit destination is to a homeless, institutional, temporary housing, or permanent housing destination. For all non-residential project enrollments except for Street Outreach, Eva "resets" the enrollment Entry Date to the date of the enrollment's first literally homeless CLS record if the enrollment does not have a literally homeless PLS. For any non-residential enrollment without an Exit Date, Eva sets the Exit Date to be 60 days after the last literally homeless CLS recorded for the enrollment or after the literally homeless PLS, whichever is later. The exception is Coordinated Entry, which uses 90 days.
Filters	Project Type Group	Non-Residential: Street Outreach Projects	A Project Type Group selection that only includes clients in Street Outreach projects. Clients enrolled in Street Outreach are assumed to be experiencing homelessness as of the enrollment's Project Start Date no matter the recorded Prior Living Situation (PLS). For Eva to consider clients active in long-term, Street Outreach enrollments, there must be a homeless living situation documented in a Current Living Situation (CLS) record every 60 days. Additionally, inactive Street Outreach enrollments are considered active 15 days prior to the enrollment exit date if the exit destination is to a homeless, institutional, temporary housing, or permanent housing destination. Clients enrolled in Street Outreach for less than 60 days are considered to be experiencing homelessness for the entire duration of that enrollment, even if there was no CLS record entered within that time period. For any Street Outreach enrollment without an Exit Date, Eva sets the Exit Date to be 60 days after the last literally homeless CLS recorded for the enrollment or after the literally homeless PLS, whichever is later.
Filters	Race/Ethnicity Methodology Type	Race/Ethnicity Methodology Type	A single-select universal filter. Eva allows users to choose the way Eva organizes system performance data when filtering by race/ethnicity demographics with possible overlapping groupings, or methodology types: Method 1 (clients are only counted in one category) or Method 2 (clients can be counted in more than one category).
Filters	Race/Ethnicity Methodology Type	Method 1	A Methodology Type selection where each client is counted in only one race/ethnicity category as well as being included in the "All Races/Ethnicities" selections. For example, a client that reported as (1) Middle Eastern or North African, (2) Black, African American, or African, and (3) Hispanic/Latina/o would be counted under "Multi-Racial & Hispanic/Latina/o," but no other race/ethnicity categories.

Category	Target Filters/Panels	Term	Definition
Filters	Race/Ethnicity Methodology Type	Method 2	A Methodology Type selection where each client may be counted in multiple race/ethnicity categories as well as being included in the "All Races/Ethnicities" selections. For example, a client that reported as (1) Middle Eastern or North African, (2) Black, African American, or African, and (3) Hispanic/Latina/o would be counted under "Middle Eastern or North African," "Black, African American, or African," and "Hispanic/Latina/o" race/ethnicity categories.
Filters	Age	Age	A multi-select demographic filter. Eva allows users to filter system performance data by age group. Age group is determined based on the client's age as of the entry date of their last enrollment included in the report period. Age groups included are: 0 to 12, 13 to 17, 18 to 21, 22 to 24, 25 to 34, 35 to 44, 45 to 54, 55 to 64, 65 to 74, 75 and older, and unknown.
Filters	Veteran Status	Veteran Status	Veteran Status of adult clients (not applicable for children) based on the response to HMIS data element 3.07 Veteran Status. There are two Veteran Status options a user can filter by: Veteran and Non-Veteran/Unknown.
Filters	Veteran Status	All Statuses	A Veteran Status selection that includes all clients, including children, regardless of their Veteran Status.
Filters	Veteran Status	Veteran	This Veteran Status includes only adult clients (18 years or older) who indicated they have been on active duty in the armed forces of the United States.
Filters	Veteran Status	Non-Veteran/Unknown	This Veteran Status only includes adult clients (18 years or older) who either (1) indicated that they have not been on active duty in the armed forces of the United States, or (2) whose Veteran Status was recorded as "Client doesn't know", "Client prefers not to answer", or "Data not collected" in HMIS.
Filters	Race/Ethnicity (Method 1)	Race/Ethnicity (Method 1)	A single-select demographic filter. Eva allows users to filter system performance by race/ethnicity categories. These categories are dependent on the Race/Ethnicity Methodology Type selection. This filter has two sections: Detailed and Summarized. Each section has different race/ethnicity categories for users to choose from. The Detailed section lists all race/ethnicity categories on their own and in combination with Hispanic/Latina/o. This section also includes two multi-racial categories. The Summarized section groups individual race/ethnicity categories together to make two options: All People of Color and White Only. When Method 1 is selected, each client is only counted in one race/ethnicity category in the Detailed section and one race/ethnicity category in the Summarized section. All clients are also included in the All Races/Ethnicities category.
Filters	Race/Ethnicity (Method 1), Race/Ethnicity (Method 2)	All Races/Ethnicities	Includes all clients, regardless of the race/ethnicity they identified as in HMIS, as well as clients whose race/ethnicity is categorized as Unknown. This Race/Ethnicity filter selection is available regardless of the Method selected.
Filters	Race/Ethnicity (Method 1)	American Indian, Alaska Native, or Indigenous alone	Includes clients who identified as only American Indian, Alaska Native, or Indigenous. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	American Indian, Alaska Native, or Indigenous & Hispanic/Latina/o	Includes clients who identified as both American Indian, Alaska Native, or Indigenous and as Hispanic/Latina/o. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.

Category	Target Filters/Panels	Term	Definition
Filters	Race/Ethnicity (Method 1)	Asian or Asian American alone	Includes clients who identified as only Asian or Asian American. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	Asian or Asian American & Hispanic/Latina/o	Includes clients who identified as both Asian or Asian American and Hispanic/Latina/o. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	Black, African American, or African alone	Includes clients who identified as only Black, African American, or African. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	Black, African American, or African & Hispanic/Latina/o	Includes clients who identified as both Black, African American, or African and Hispanic/Latina/o. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1), Race/Ethnicity (Method 2)	Hispanic/Latina/o alone	Includes clients who identified as only Hispanic/Latina/o and no other race/ethnicity. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list when Method 1 is selected and under the Summarized section of the filter dropdown list when Method 2 is selected.
Filters	Race/Ethnicity (Method 1)	Middle Eastern or North African alone	Includes clients who only selected Middle Eastern or North African and no other race/ethnicity category. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	Middle Eastern or North African & Hispanic/Latina/o	Includes clients who identified as both Middle Eastern or North African and Hispanic/Latina/o. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	Multi-Racial (not Hispanic/Latina/o)	Includes clients who identified as multiple races (2+) but not as Hispanic/Latina/o. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	Multi-Racial & Hispanic/Latina/o	Includes clients who identified as Hispanic/Latina/o together with two or more other races/ethnicities. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	Native Hawaiian or Pacific Islander alone	Includes clients who identified as only Native Hawaiian or Pacific Islander. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	Native Hawaiian or Pacific Islander & Hispanic/Latina/o	Includes clients who identified as both Native Hawaiian or Pacific Islander and Hispanic/Latina/o. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	White alone	Includes clients who identified as only White. This Race/Ethnicity filter selection is listed under both the Detailed and Summarized sections of the filter dropdown list and is only available when Method 1 is selected.

Category	Target Filters/Panels	Term	Definition
Filters	Race/Ethnicity (Method 1)	White & Hispanic/Latina/o	Includes clients who identified as both White and Hispanic/Latina/o. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 1)	All People of Color	Includes clients who identified as a race or ethnicity other than White. This Race/Ethnicity filter selection is listed under the Summarized section of the filter dropdown list and is only available when Method 1 is selected.
Filters	Race/Ethnicity (Method 2)	Race/Ethnicity (Method 2)	A single-select demographic filter. Eva allows users to filter system performance by race/ethnicity categories. These categories are dependent on the Race/Ethnicity Methodology Type selection. This filter has two sections: Detailed and Summarized. Each section has different race/ethnicity categories for users to choose from. The Detailed section lists all race/ethnicity categories on their own. The Summarized section groups race/ethnicity categories together into three options: Black, African American or African and Hispanic/Latina/o, Hispanic/Latina/o Alone, and Hispanic/Latina/o. When Method 2 is selected, each client may be counted in multiple race/ethnicity categories in the Detailed section and in multiple race/ethnicity categories in the Summarized section. All clients are also included in the All Races/Ethnicities category.
Filters	Race/Ethnicity (Method 2)	American Indian, Alaska Native, or Indigenous	Includes clients who identified as American Indian, Alaska Native, or Indigenous alone or in combination with any other race/ethnicity. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 2 is selected.
Filters	Race/Ethnicity (Method 2)	Asian or Asian American	Includes clients who identified as Asian or Asian American alone or in combination with any other race/ethnicity. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 2 is selected.
Filters	Race/Ethnicity (Method 2)	Black, African American, or African	Includes clients who identified as Black, African American, or African alone or in combination with any other race/ethnicity. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 2 is selected.
Filters	Race/Ethnicity (Method 2)	Hispanic/Latina/o	Includes clients who identified as Hispanic/Latina/o alone or in combination with any other race/ethnicity. This Race/Ethnicity filter selection is listed under the Detailed and Summarized sections of the filter dropdown list and is only available when Method 2 is selected.
Filters	Race/Ethnicity (Method 2)	Middle Eastern or North African	Includes clients who identified as Middle Eastern or North African alone or in combination with any other race/ethnicity. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 2 is selected.
Filters	Race/Ethnicity (Method 2)	Native Hawaiian or Pacific Islander	Includes clients who identified as Native Hawaiian or Pacific Islander alone or in combination with any other race/ethnicity. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 2 is selected.
Filters	Race/Ethnicity (Method 2)	White	Includes clients who identified as White alone or in combination with any other race/ethnicity. This Race/Ethnicity filter selection is listed under the Detailed section of the filter dropdown list and is only available when Method 2 is selected.

Category	Target Filters/Panels	Term	Definition
Filters	Race/Ethnicity (Method 2)	Black, African American or African and Hispanic/Latina/o	Includes clients who identified as both Black, African American or African and Hispanic/Latina/o together or in combination with any other race/ethnicity. Listed under the Summarized section. This Race/Ethnicity filter selection is listed under the Summarized section of the filter dropdown list and is only available when Method 2 is selected.
Charts	System Flow	Total Change	Total Change is calculated by subtracting the number of clients who flowed out of the system from the number of clients who flowed into the system (Inflow - Outflow). This value can be positive or negative. A negative change value means more clients left the system than flowed into the system. A positive change value means more clients flowed into the system than left the system. Used in the System Flow Summary and Detail charts.
Charts	System Flow	Monthly Change	Monthly Change is calculated by subtracting the number of clients who flowed out of the system from the number of clients who flowed into the system for a given month (Inflow - Outflow). This value can be positive or negative. A negative change value means more clients left the system than flowed into the system for that month. A positive change value means more clients flowed into the system than left the system. Used in the System Flow Month-by-Month chart.
Charts	System Flow	Average Monthly Inflow	Average Monthly Inflow is calculated by summing all monthly Inflow values and dividing by 12. Inflow values exclude Continuous at Start and Unknown at Start. Used in the System Flow Month-by-Month chart.
Charts	System Flow	Average Monthly Outflow	Average Monthly Outflow is calculated by summing all monthly Outflow values and dividing by 12. Outflow values exclude Continuous at End. Used in the System Flow Month-by-Month chart.
Charts	System Flow	Average Monthly Change	Average Monthly Change is calculated by summing all Monthly Change values and dividing by 12. This value can be positive or negative. A negative change value means more clients left the system than flowed into the system for that month. A positive change value means more clients flowed into the system than left the system. Used in the System Flow Month-by-Month chart.
Charts	System Flow, Client System Status	Homeless (Active at Start/Period Start)	This system status indicates a client was actively experiencing homelessness as of the start of the report period. This includes clients who were enrolled in: (1) Emergency Shelter - Entry/Exit, Safe Haven, or Transitional Housing projects, (2) Emergency Shelter - Night-by-Night projects with a Project Start Date or recorded bed night within the 15-day period prior to the report start date, (3) Street Outreach projects with a Project Start Date or documented homeless living situation in a Current Living Situation record within the 60-day period prior to the report start date, (4) Supportive Services Only, Day Shelter or Other type projects with a documented homeless living situation in the Prior Living Situation or a Current Living Situation recorded within the 60-day period prior to the report start date, (5) Permanent Housing projects, either without a Housing Move-In Date or with a Housing Move-In Date on or after the report start date, (6) Coordinated Entry projects with a documented homeless living situation in the Prior Living Situation or Current Living Situation recorded prior to the 90-day period before the report start date. Additionally, in the System Flow Summary and Detail charts, clients may be considered experiencing homelessness on the first day of the report if they have an exit right before the report start date that does not qualify as a system exit due to a subsequent enrollment entry in the 14 days following the exit.

Category	Target Filters/Panels	Term	Definition
Charts	System Flow, Client System Status	Housed (Active at Start/Period Start)	This system status indicates a client was actively housed in the system as of the start of the report period. All clients with this status were enrolled in a permanent housing (PH) project with a Housing Move-In Date before the report start date. Additionally, clients may be considered housed as of the start of the report period if they have an exit to a permanent destination from a PH project right before the report start date that does not qualify as a system exit due to a subsequent enrollment in a PH project in the 14 days following the exit. The previously exited PH enrollment must also have a Move-In Date.
Charts	System Flow	Continuous at Start	This system status indicates a client who is not categorized as Active at Start or Inflow for a given month but who is experiencing homelessness during that month. Used in the System Flow Month-by-Month chart. While this category is not displayed on the chart, monthly counts are provided in the chart's data download.
Charts	System Flow	Continuous at End	This system status indicates a client who is not categorized as Active at End or Outflow for a given month but who is experiencing homelessness during that month. Used in the System Flow Month-by-Month chart. While this category is not displayed on the chart, monthly counts are provided in the chart's data download.
Charts	System Flow	Unknown at Start	This system status indicates a client who is inactive in a non-residential enrollment at the start of the period, exits that enrollment later in the same period, and has no other enrollment entry or homeless CLS record during that period which could provide information for a different inflow status. Used in the System Flow Month-by-Month chart. While this category is not displayed on the chart, monthly counts are provided in the chart's data download.
Charts	System Flow	Inflow	The number of clients that entered or flowed into the system. This status indicates a client entered a system project after the report period's start date. This status excludes all clients who were counted as homeless or housed at the start of the report period. In the System Flow Month-by-Month chart, Continuous at Start and Unknown at Start are not considered true inflow and are excluded from inflow counts and calculations on the chart.
Charts	System Flow	First-Time Homeless	This inflow system status indicates a client who entered the system after the report period's start date and who also had not been served in the system within the 24 months prior to their entry into the report period. This inflow system status is only available when a dataset with 36 months of data is uploaded to Eva.
Charts	System Flow	Returned from Permanent	This inflow system status indicates a client who entered the system after the report period's start date and who had a previous exit to a permanent destination within the 24 months prior to their entry. Permanent destinations include renting or owning permanent housing with or without subsidy, and staying or living with friends or family with a permanent tenure.

Category	Target Filters/Panels	Term	Definition
Charts	System Flow	Re-engaged from Non-Permanent	This inflow system status indicates a client who entered the system after the report period's start date and who had a previous exit to a homeless, temporary, institutional destination or unknown destination within the 24 months prior to their entry. A temporary destination could be a hotel or motel paid for without an ES voucher. An institutional destination refers to group/assisted living, a medical facility, or incarceration. An unknown destination often refers to when a client does not report their exit destination. Additionally, clients may be considered Re-engaged from Non-Permanent if they are enrolled in a non-residential project in which they are considered "Inactive" who then: (1) have a documented homeless living situation in a Current Living Situation record later during the report period, (2) are considered active 15 days prior to an exit, or (3) are enrolled in a different project with an entry date that overlaps with the Inactive enrollment. These clients are considered as re-engaging with the system from an unknown situation (i.e., a period of inactivity).
Charts	System Flow	Inflow Unspecified	This system status indicates a client who entered the system after the report start date, but it cannot be determined if they are newly homeless because there is not enough lookback data. This inflow system status takes the place of First-Time Homeless in cases where less than 36 months of data are uploaded to Eva.
Charts	System Flow	Outflow	The number of clients that left or flowed out of the system. This status indicates a client exited a system project after the report period's start date and before the report period's end date. A client cannot be counted in both outflow and active at end. In the System Flow Month-by-Month chart, Continuous at End is not considered true outflow and is excluded from outflow counts and calculations on the chart.
Charts	System Flow, Client System Status	Exited, Non-Permanent	This outflow system status indicates a client exited the system to a homeless, temporary, institutional, or unknown destination as defined in the HMIS Data Standards. A temporary destination could be a hotel or motel paid for without an ES voucher. An institutional destination refers to group/assisted living, a medical facility, or incarceration. An unknown destination often refers to when a client does not report their exit destination or when destination data is not collected in HMIS.
Charts	System Flow, Client System Status	Exited, Permanent	This outflow system status indicates a client exited the system to a permanent destination as defined in the HMIS Data Standards. Permanent destinations include renting or owning permanent housing with or without subsidy and staying or living with friends or family with a permanent tenure.
Charts	System Flow, Client System Status	Inactive (Outflow/Period End)	A client is counted in inactive outflow/period end if they ended the report period with (1) an open enrollment in an Emergency Shelter - Night-by-Night project that has not had a bed night recorded within the last 15 days of the report period, (2) an open enrollment in any Street Outreach, Day Shelter, Supportive Services, or Other project without a homeless living situation documented in a Current Living Situation (CLS) record within the last 60 days of the report period, or (3) an open enrollment in Coordinated Entry without a homeless living situation documented in a CLS record within the last 90 days of the report period. In the System Flow Month-by-Month chart, clients are counted as Inactive in the first month they become inactive and are then dropped from the chart for subsequent months unless they re-engage with the system again prior to the end of the report.

Category	Target Filters/Panels	Term	Definition
Charts	System Flow, Client System Status	Homeless (Active at End) or Enrolled, Homeless	This system status indicates a client was actively experiencing homelessness in the system at the end of the report period. This includes clients who were enrolled in: (1) Emergency Shelter - Entry/Exit, Safe Haven, or Transitional Housing projects, (2) Emergency Shelter - Night-by-Night projects with a Project Start Date or recorded bed night within the 15-day period before the report end date, (3) Street Outreach projects with a Project Start Date or documented homeless living situation in a Current Living Situation record within the 60-day period before the report end date, (4) Supportive Services Only, Day Shelter or Other type projects with a documented homeless living situation in the Prior Living Situation or a Current Living Situation recorded within the 60-day period before the report end date, (5) Permanent Housing projects, either without a Housing Move-In Date or with a Housing Move-In Date after the report end date, or (6) Coordinated Entry projects with a documented homeless living situation in the Prior Living Situation or Current Living Situation recorded within the 90-day period before the report end date. Additionally, clients may be considered experiencing homelessness on the last day of the report if they have an exit right before the report end date that does not qualify as a system exit due to a subsequent enrollment entry in the 14 days following the exit.
Charts	System Flow, Client System Status	Housed (Active at End) or Enrolled, Housed	This system status indicates a client was actively housed in the system at the end of the report period. All clients with this status were enrolled in a Permanent Housing (PH) project with a Housing Move-In Date before the report end date. Additionally, clients may be considered housed as of the end of the report period if they have an exit to a permanent destination from a PH project right before the report end date that does not qualify as a system exit due to a subsequent enrollment in a PH project in the 14 days following the exit. The previously exited PH enrollment must also have a Move-In Date.
Charts	System Flow, Client System Status, Exits by Type, Exits by Year, Exits by Subpopulation, Permanent Housing Demographics	System Exits	An exit from any project where there is no subsequent enrollment in any project type for the household in the 14 days following the exit. Clients may have more than one system exit during the report period. When looking at system exits during the report period, the determination of whether someone is exiting to a homeless, temporary, permanent, or other destination type is based on the recorded destination of this last exit.
Charts	Exits by Year	Percent Change	Percent Change represents how much a destination category's share of total system exits has increased or decreased compared to the previous year's system exits. This metric reflects the relative change over time, rather than the absolute percentage?point difference. It is calculated as the difference between the count of system exits in the current year versus the previous year, which is then divided by the count of system exits in the previous year. This value can be positive or negative. A negative change value means a decrease in system exits compared to the previous year. A positive change value means an increase in system exits compared to the previous year. Percent Change can only be calculated for a destination category when the previous year's system exits are greater than zero.

Category	Target Filters/Panels	Term	Definition
Charts	Exits by Subpopulation	Percent Difference	The Percent Difference represents the relative gap in system exits between two population groups—a user-defined subpopulation and everyone else that is not in that selected subpopulation. It is calculated as the difference between the count of system exits for each population group, which is then divided by the average number of system exits of the two groups. This value is always positive. A higher percent difference indicates a larger relative gap between the two population groups, while a smaller percent difference suggests the groups are more similar proportionally. Percent Difference can only be calculated for a destination category when both population groups have a count of system exits greater than zero.
Charts	Exits by Type, Exits by Year, Exits by Subpopulation, Permanent Housing Demographics	Permanent (Destination Category) or Permanent Housing (PH)	This system exit destination category indicates a client exited the system to a permanent destination as defined in the HMIS Data Standards. Permanent housing situation destinations include (1) staying or living with family, permanent tenure, (2) staying or living with friends, permanent tenure, (3) moved from one HOPWA funded project to HOPWA PH, (4) rental by client, no ongoing housing subsidy, (5) rental by client, with ongoing housing subsidy, (6) owned by client, with ongoing housing subsidy, and (7) owned by client, no ongoing housing subsidy. In the system exit charts, the count of system exits under the permanent destination category represents the number of clients that exited to a permanent destination on their last project enrollment during the report period. In the Summary and Detail System Flow charts and the Client System Status chart, these exits to a homeless destination are counted under Exited, Permanent.
Charts	Exits by Type, Exits by Year, Exits by Subpopulation	Homeless (Destination Category)	This system exit destination category indicates a client exited the system to a homeless destination as defined in the HMIS Data Standards. Homeless situation destinations include (1) place not meant for habitation (e.g., a vehicle, an abandoned building, bus/train/subway station/airport or anywhere outside), (2) Emergency Shelter, including hotel or motel paid for with emergency shelter voucher, Host Home shelter, and (3) Safe Haven. In the system exit charts, the count of system exits under the homeless destination category represents the number of clients that exited to a homeless destination on their last project enrollment during the report period. In the Summary and Detail System Flow charts and the Client System Status chart, these exits to a homeless destination are counted under Exited, Non-Permanent.
Charts	Exits by Type, Exits by Year, Exits by Subpopulation	Institutional (Destination Category)	This system exit destination category indicates a client exited the system to an institutional destination as defined in the HMIS Data Standards. Institutional situation destinations include (1) foster care home or foster care group home, (2) hospital or other residential non-psychiatric medical facility, (3) jail, prison, or juvenile detention facility, (4) long-term care facility or nursing home, (5) psychiatric hospital or other psychiatric facility, and (6) substance abuse treatment facility or detox center. In the system exit charts, the count of system exits under the institutional destination category represents the number of clients that exited to an institutional destination on their last project enrollment during the report period. In the Summary and Detail System Flow charts and the Client System Status chart, these exits to an institutional destination are counted under Exited, Non-Permanent.

Category	Target Filters/Panels	Term	Definition
Charts	Exits by Type, Exits by Year, Exits by Subpopulation	Temporary (Destination Category)	This system exit destination category indicates a client exited the system to a temporary destination as defined in the HMIS Data Standards. Temporary housing situation destinations include (1) transitional housing for homeless persons (including homeless youth), (2) residential project or halfway house with no homeless criteria, (3) hotel or motel paid for without emergency shelter voucher, (4) Host Home (non-crisis), (5) staying or living with family, temporary tenure (e.g., room, apartment, or house), (6) Staying or living with friends, temporary tenure (e.g., room, apartment, or house), and (7) moved from one HOPWA funded project to HOPWA TH. In the system exit charts, the count of system exits under the temporary destination category represents the number of clients that exited to a temporary destination on their last project enrollment during the report period. In the Summary and Detail System Flow charts and the Client System Status chart, these exits to a temporary destination are counted under Exited, Non-Permanent.
Charts	Exits by Type, Exits by Year, Exits by Subpopulation	Other/Unknown (Destination Category)	This system exit destination category indicates a client exited the system to an other/unknown destination as defined in the HMIS Data Standards. Other/Unknown housing situation destinations include when there was no exit interview completed, when the data was not collected, or if the client was deceased. In the system exit charts, the count of system exits under the other/unknown destination category represents the number of clients that exited to an other/unknown destination on their last project enrollment during the report period. In the Summary and Detail System Flow charts and the Client System Status chart, these exits to an other/unknown destination are counted under Exited, Non-Permanent. Additionally, clients that fall under the Eva calculated system status of “Inactive” are included in this destination category.
